TestOut Server Pro 2016: Identity - English 4.0.x

TEXTBOOK MAPPING

	Objective Mapping: LabSim Section to Microsoft 70-742 Objective	TestOut Server Pro 2016: MCSA Guide to Identity with Window	
	Cojective Mapping. Europin Section to Microsoft 70 7 12 Cojective	Identity	Server 2016
#	Domain	ISBN: 978-1-935080-68-8 Author: TestOut	ISBN: 978-1-337-40089-3 Author(s): Tomsho
1.0	Install and Configure Active Directory Domain Services (AD DS)	Section	Chapter
1.1	Install and configure domain controllers	1.1, 1.2, 1.3, 1.4, 1.5	1, 6, 7
	1.1.1 Install a new forest	2.2	
	1.1.2 Add or remove a domain controller from a domain		
	1.1.3 Upgrade a domain controller		
	1.1.4 Install AD DS on a Server Core installation		
	1.1.5 Install a domain controller from Install from Media (IFM) 1.1.6 Resolve DNS SRV record registration issues		
	1.1.7 Configure a global catalog server		
	1.1.8 Transfer and seize operations master roles		
	1.1.9 Install and configure a read-only domain controller (RODC)		
	1.1.10 Configure domain controller cloning		
1.2	Create and manage Active Directory users and computers	3.2, 3.3, 3.6, 3.7	2, 4
	1.2.1 Automate the creation of Active Directory accounts		
1	1.2.2 Create, copy, configure, and delete users and computers		
	1.2.3 Configure templates 1.2.4 Perform bulk Active Directory operations		
	1.2.5 Configure user rights		
	1.2.6 Implement offline domain join		
	1.2.7 Manage inactive and disabled accounts		
	1.2.8 Automate unlocking of disabled accounts		
	1.2.9 Automate password resets		
1.3	Create and manage Active Directory groups and organizational units (OUs)	3.1, 3.4	1, 2, 4
	1.3.1 Configure group nesting		
	1.3.2 Convert groups		
Í	o 1.3.2.1 Security o 1.3.2.2 Universal		
	o 1.3.2.3 Domain local		
	o 1.3.2.4 Global		
	1.3.3 Manage group membership using Group Policy		
	1.3.4 Enumerate group membership		
	1.3.5 Automate group membership management using Windows PowerShell		
	1.3.6 Delegate the creation and management of Active Directory groups and OUs		
	1.3.7 Manage default Active Directory containers		
2.0	1.3.8 Create, copy, configure, and delete groups and OUs Manage and Maintain AD DS		
2.0	Manage and Managin AD D5		
2.1	Configure service authentication and account policies	3.5, 3.7, 4.1	3
	2.1.1 Create and configure Service Accounts		
	2.1.2 Create and configure Group Managed Service Accounts (gMSAs)		
	2.1.3 Configure Kerberos Constrained Delegation (KCD)		
	2.1.4 Manage Service Principal Names (SPNs)		
	2.1.5 Configure virtual accounts 2.1.6 Configure domain and local user password policy settings		
	2.1.7 Configure and apply Password Settings Objects (PSOs)		
	2.1.8 Delegate password settings management		
	2.1.9 Configure account lockout policy settings		
	2.1.10 Configure Kerberos policy settings within Group Policy		
	2.1.11 Configure Authentication Policies and Authentication Policy Silos	14.55	
2.2	Maintain Active Directory	1.4, 2.3	1, 6, 7
	2.2.1 Back up Active Directory and SYSVOL	4.1, 4.2	
	2.2.2 Manage Active Directory offline		
	2.2.3 Perform offline defragmentation of an Active Directory database		
	2.2.4 Clean up metadata		
	2.2.5 Configure Active Directory snapshots		
	2.2.6 Perform object- and container-level recovery		
	2.2.7 Perform Active Directory restore		
	2.2.8 Configure and restore objects by using the Active Directory Recycle Bin		
	2.2.9 Configure replication to Read-Only Domain Controllers (RODCs)		
	2.2.10 Configure Password Replication Policy (PRP) for RODC		
	2.2.11 Monitor and manage replication		
	2.2.12 Upgrade SYSVOL replication to Distributed File System Replication (DFSR)		

2.3	Configure Active Directory in a complex enterprise environment	2.1, 2.4	1, 7
	2.3.1 Configure a multi-domain and multi-forest Active Directory infrastructure	4.3	, ,
	2.3.2 Deploy Windows Server 2016 domain controllers within a preexisting Active Directory		
	environment		
	2.3.3 Upgrade existing domains and forests		
	1		
	2.3.4 Configure domain and forest functional levels		
	2.3.5 Configure multiple user principal name (UPN) suffixes		
	2.3.6 Configure external, forest, shortcut, and realm trusts		
	2.3.7 Configure trust authentication		
	2.3.8 Configure SID filtering		
	2.3.9 Configure name suffix routing		
	2.3.10 Configure sites and subnets		
	2.3.11 Create and configure site links		
	2.3.12 Manage site coverage		
	2.3.13 Manage registration of SRV records		
	2.3.14 Move domain controllers between sites		
3.0	Create and Manage Group Policy		
3.0	Create and manage Group , oney		
3.1	Create and manage Group Policy Objects (GPOs)	5.1, 5.9, 5.10	4, 5
	3.1.1 Configure a central store		
	3.1.2 Manage starter GPOs		
	3.1.3 Configure GPO links		
İ	3.1.4 Configure multiple local Group Policies		
	3.1.5 Back up, import, copy, and restore GPOs		
	3.1.6 Create and configure a migration table		
	3.1.7 Reset default GPOs		
	3.1.8 Delegate Group Policy management		
	3.1.9 Detect health issues using the Group Policy Infrastructure Status page		
3.2	Configure Group Policy processing	5.2, 5.10	5
	3.2.1 Configure processing order and precedence		
	3.2.2 Configure blocking of inheritance		
	3.2.3 Configure enforced policies		
	3.2.4 Configure security filtering and Windows Management Instrumentation (WMI) filtering		
	The second secon		
	3.2.5 Configure loopback processing		
	3.2.6 Configure and manage slow-link processing and Group Policy caching		
	3.2.7 Configure client-side extension (CSE) behavior		
	3.2.8 Force a Group Policy update		
3.3	Configure Group Policy settings	5.3, 5.4, 5.7	4
	3.3.1 Configure software installation		
	3.3.2 Configure folder redirection		
	3.3.3 Configure scripts		
	1 3 3 4 Configure administrative templates		
	3.3.4 Configure administrative templates		
	3.3.5 Import security templates		
	3.3.5 Import security templates 3.3.6 Import a custom administrative template file		
	3.3.5 Import security templates 3.3.6 Import a custom administrative template file 3.3.7 Configure filtering for administrative template		
3.4	3.3.5 Import security templates 3.3.6 Import a custom administrative template file 3.3.7 Configure filtering for administrative template Configure Group Policy preferences	5.8	4
3.4	3.3.5 Import security templates 3.3.6 Import a custom administrative template file 3.3.7 Configure filtering for administrative template Configure Group Policy preferences 3.4.1 Configure printer preferences	5.8	4
3.4	3.3.5 Import security templates 3.3.6 Import a custom administrative template file 3.3.7 Configure filtering for administrative template Configure Group Policy preferences 3.4.1 Configure printer preferences 3.4.2 Define network drive mappings	5.8	4
3.4	3.3.5 Import security templates 3.3.6 Import a custom administrative template file 3.3.7 Configure filtering for administrative template Configure Group Policy preferences 3.4.1 Configure printer preferences 3.4.2 Define network drive mappings 3.4.3 Configure power options	5.8	4
3.4	3.3.5 Import security templates 3.3.6 Import a custom administrative template file 3.3.7 Configure filtering for administrative template Configure Group Policy preferences 3.4.1 Configure printer preferences 3.4.2 Define network drive mappings	5.8	4
3.4	3.3.5 Import security templates 3.3.6 Import a custom administrative template file 3.3.7 Configure filtering for administrative template Configure Group Policy preferences 3.4.1 Configure printer preferences 3.4.2 Define network drive mappings 3.4.3 Configure power options	5.8	4
3.4	3.3.5 Import security templates 3.3.6 Import a custom administrative template file 3.3.7 Configure filtering for administrative template Configure Group Policy preferences 3.4.1 Configure printer preferences 3.4.2 Define network drive mappings 3.4.3 Configure power options 3.4.4 Configure custom registry settings 3.4.5 Configure Control Panel settings	5.8	4
3.4	3.3.5 Import security templates 3.3.6 Import a custom administrative template file 3.3.7 Configure filtering for administrative template Configure Group Policy preferences 3.4.1 Configure printer preferences 3.4.2 Define network drive mappings 3.4.3 Configure power options 3.4.4 Configure custom registry settings 3.4.5 Configure Control Panel settings 3.4.6 Configure Internet Explorer settings	5.8	4
3.4	3.3.5 Import security templates 3.3.6 Import a custom administrative template file 3.3.7 Configure filtering for administrative template Configure Group Policy preferences 3.4.1 Configure printer preferences 3.4.2 Define network drive mappings 3.4.3 Configure power options 3.4.4 Configure custom registry settings 3.4.5 Configure Control Panel settings 3.4.6 Configure Internet Explorer settings 3.4.7 Configure file and folder deployment	5.8	4
3.4	3.3.5 Import security templates 3.3.6 Import a custom administrative template file 3.3.7 Configure filtering for administrative template Configure Group Policy preferences 3.4.1 Configure printer preferences 3.4.2 Define network drive mappings 3.4.3 Configure power options 3.4.4 Configure custom registry settings 3.4.5 Configure Control Panel settings 3.4.6 Configure Internet Explorer settings 3.4.7 Configure file and folder deployment 3.4.8 Configure shortcut deployment	5.8	4
	3.3.5 Import security templates 3.3.6 Import a custom administrative template file 3.3.7 Configure filtering for administrative template Configure Group Policy preferences 3.4.1 Configure printer preferences 3.4.2 Define network drive mappings 3.4.3 Configure power options 3.4.4 Configure custom registry settings 3.4.5 Configure Control Panel settings 3.4.6 Configure Internet Explorer settings 3.4.7 Configure file and folder deployment 3.4.8 Configure shortcut deployment 3.4.9 Configure item-level targeting	5.8	4
3.4	3.3.5 Import security templates 3.3.6 Import a custom administrative template file 3.3.7 Configure filtering for administrative template Configure Group Policy preferences 3.4.1 Configure printer preferences 3.4.2 Define network drive mappings 3.4.3 Configure power options 3.4.4 Configure custom registry settings 3.4.5 Configure Control Panel settings 3.4.6 Configure Internet Explorer settings 3.4.7 Configure file and folder deployment 3.4.8 Configure shortcut deployment	5.8	4
4.0	3.3.5 Import security templates 3.3.6 Import a custom administrative template file 3.3.7 Configure filtering for administrative template Configure Group Policy preferences 3.4.1 Configure printer preferences 3.4.2 Define network drive mappings 3.4.3 Configure power options 3.4.4 Configure custom registry settings 3.4.5 Configure Control Panel settings 3.4.6 Configure Internet Explorer settings 3.4.7 Configure file and folder deployment 3.4.8 Configure shortcut deployment 3.4.9 Configure item-level targeting Implement Active Directory Certificate Services (AD CS)		
	3.3.5 Import security templates 3.3.6 Import a custom administrative template file 3.3.7 Configure filtering for administrative template Configure Group Policy preferences 3.4.1 Configure printer preferences 3.4.2 Define network drive mappings 3.4.3 Configure power options 3.4.4 Configure custom registry settings 3.4.5 Configure Control Panel settings 3.4.6 Configure Internet Explorer settings 3.4.7 Configure liternet Explorer settings 3.4.7 Configure Internet deployment 3.4.8 Configure shortcut deployment 3.4.9 Configure item-level targeting Implement Active Directory Certificate Services (AD CS) Install and configure AD CS	6.1, 6.4, 6.5, 6.7	8
4.0	3.3.5 Import security templates 3.3.6 Import a custom administrative template file 3.3.7 Configure filtering for administrative template Configure Group Policy preferences 3.4.1 Configure printer preferences 3.4.2 Define network drive mappings 3.4.3 Configure power options 3.4.4 Configure custom registry settings 3.4.5 Configure Control Panel settings 3.4.6 Configure Internet Explorer settings 3.4.7 Configure file and folder deployment 3.4.8 Configure shortcut deployment 3.4.9 Configure item-level targeting Implement Active Directory Certificate Services (AD CS) Install and configure AD CS 4.1.1 Install Active Directory Integrated Enterprise Certificate Authority (CA)		
4.0	3.3.5 Import security templates 3.3.6 Import a custom administrative template file 3.3.7 Configure filtering for administrative template Configure Group Policy preferences 3.4.1 Configure printer preferences 3.4.2 Define network drive mappings 3.4.3 Configure power options 3.4.4 Configure custom registry settings 3.4.5 Configure Control Panel settings 3.4.6 Configure Internet Explorer settings 3.4.7 Configure file and folder deployment 3.4.8 Configure shortcut deployment 3.4.9 Configure item-level targeting Implement Active Directory Certificate Services (AD CS) Install and configure AD CS 4.1.1 Install Active Directory Integrated Enterprise Certificate Authority (CA) 4.1.2 Install offline root and subordinate CAs		
4.0	3.3.5 Import security templates 3.3.6 Import a custom administrative template file 3.3.7 Configure filtering for administrative template Configure Group Policy preferences 3.4.1 Configure printer preferences 3.4.2 Define network drive mappings 3.4.3 Configure power options 3.4.4 Configure custom registry settings 3.4.5 Configure custom registry settings 3.4.6 Configure Control Panel settings 3.4.7 Configure Internet Explorer settings 3.4.7 Configure file and folder deployment 3.4.8 Configure shortcut deployment 3.4.9 Configure item-level targeting Implement Active Directory Certificate Services (AD CS) Install and configure AD CS 4.1.1 Install Active Directory Integrated Enterprise Certificate Authority (CA) 4.1.2 Install offline root and subordinate CAs 4.1.3 Install standalone CAs		
4.0	3.3.5 Import security templates 3.3.6 Import a custom administrative template file 3.3.7 Configure filtering for administrative template Configure Group Policy preferences 3.4.1 Configure printer preferences 3.4.2 Define network drive mappings 3.4.3 Configure power options 3.4.4 Configure custom registry settings 3.4.5 Configure Control Panel settings 3.4.6 Configure Internet Explorer settings 3.4.7 Configure file and folder deployment 3.4.8 Configure shortcut deployment 3.4.9 Configure shortcut deployment 3.4.9 Configure item-level targeting Implement Active Directory Certificate Services (AD CS) Install and configure AD CS 4.1.1 Install Active Directory Integrated Enterprise Certificate Authority (CA) 4.1.2 Install offline root and subordinate CAs 4.1.3 Install standalone CAs 4.1.4 Configure Certificate Revocation List (CRL) distribution points		
4.0	3.3.5 Import security templates 3.3.6 Import a custom administrative template file 3.3.7 Configure filtering for administrative template Configure Group Policy preferences 3.4.1 Configure printer preferences 3.4.2 Define network drive mappings 3.4.3 Configure power options 3.4.4 Configure custom registry settings 3.4.5 Configure Control Panel settings 3.4.6 Configure Internet Explorer settings 3.4.7 Configure file and folder deployment 3.4.8 Configure shortcut deployment 3.4.9 Configure item-level targeting Implement Active Directory Certificate Services (AD CS) Install and configure AD CS 4.1.1 Install Active Directory Integrated Enterprise Certificate Authority (CA) 4.1.2 Install offline root and subordinate CAs 4.1.3 Install standalone CAs 4.1.4 Configure Certificate Revocation List (CRL) distribution points 4.1.5 Install and configure Online Responder		
4.0	3.3.5 Import security templates 3.3.6 Import a custom administrative template file 3.3.7 Configure filtering for administrative template Configure Group Policy preferences 3.4.1 Configure printer preferences 3.4.2 Define network drive mappings 3.4.3 Configure power options 3.4.4 Configure custom registry settings 3.4.5 Configure Control Panel settings 3.4.6 Configure Control Panel settings 3.4.7 Configure file and folder deployment 3.4.8 Configure file and folder deployment 3.4.9 Configure item-level targeting Implement Active Directory Certificate Services (AD CS) Install and configure AD CS 4.1.1 Install Active Directory Integrated Enterprise Certificate Authority (CA) 4.1.2 Install offline root and subordinate CAs 4.1.3 Install standalone CAs 4.1.4 Configure Certificate Revocation List (CRL) distribution points 4.1.5 Install and configure Online Responder 4.1.6 Implement administrative role separation		
4.0	3.3.5 Import security templates 3.3.6 Import a custom administrative template file 3.3.7 Configure filtering for administrative template Configure Group Policy preferences 3.4.1 Configure printer preferences 3.4.2 Define network drive mappings 3.4.3 Configure power options 3.4.4 Configure custom registry settings 3.4.5 Configure Control Panel settings 3.4.6 Configure Internet Explorer settings 3.4.7 Configure literante Explorer settings 3.4.9 Configure ilterante deployment 3.4.9 Configure item-level targeting Implement Active Directory Certificate Services (AD CS) Install and configure AD CS 4.1.1 Install Active Directory Integrated Enterprise Certificate Authority (CA) 4.1.2 Install standalone CAs 4.1.3 Install standalone CAs 4.1.4 Configure Certificate Revocation List (CRL) distribution points 4.1.5 Install and configure Online Responder 4.1.6 Implement administrative role separation 4.1.7 Configure CA backup and recovery		
4.0	3.3.5 Import security templates 3.3.6 Import a custom administrative template file 3.3.7 Configure filtering for administrative template Configure Group Policy preferences 3.4.1 Configure printer preferences 3.4.2 Define network drive mappings 3.4.3 Configure power options 3.4.4 Configure custom registry settings 3.4.5 Configure Control Panel settings 3.4.6 Configure Control Panel settings 3.4.7 Configure file and folder deployment 3.4.8 Configure file and folder deployment 3.4.9 Configure item-level targeting Implement Active Directory Certificate Services (AD CS) Install and configure AD CS 4.1.1 Install Active Directory Integrated Enterprise Certificate Authority (CA) 4.1.2 Install offline root and subordinate CAs 4.1.3 Install standalone CAs 4.1.4 Configure Certificate Revocation List (CRL) distribution points 4.1.5 Install and configure Online Responder 4.1.6 Implement administrative role separation		
4.0	3.3.5 Import security templates 3.3.6 Import a custom administrative template file 3.3.7 Configure filtering for administrative template Configure Group Policy preferences 3.4.1 Configure printer preferences 3.4.2 Define network drive mappings 3.4.3 Configure power options 3.4.4 Configure custom registry settings 3.4.5 Configure Control Panel settings 3.4.6 Configure Internet Explorer settings 3.4.7 Configure liternet Explorer settings 3.4.9 Configure shortcut deployment 3.4.8 Configure shortcut deployment 3.4.9 Configure item-level targeting Implement Active Directory Certificate Services (AD CS) Install and configure AD CS 4.1.1 Install Active Directory Integrated Enterprise Certificate Authority (CA) 4.1.2 Install offline root and subordinate CAs 4.1.3 Install standalone CAs 4.1.4 Configure Certificate Revocation List (CRL) distribution points 4.1.5 Install and configure Online Responder 4.1.6 Implement administrative role separation 4.1.7 Configure CA backup and recovery Manage certificates	6.1, 6.4, 6.5, 6.7	8
4.0	3.3.5 Import security templates 3.3.6 Import a custom administrative template file 3.3.7 Configure filtering for administrative template Configure Group Policy preferences 3.4.1 Configure printer preferences 3.4.2 Define network drive mappings 3.4.3 Configure power options 3.4.4 Configure custom registry settings 3.4.5 Configure Control Panel settings 3.4.6 Configure Internet Explorer settings 3.4.7 Configure file and folder deployment 3.4.8 Configure shortcut deployment 3.4.9 Configure item-level targeting Implement Active Directory Certificate Services (AD CS) Install and configure AD CS 4.1.1 Install Active Directory Integrated Enterprise Certificate Authority (CA) 4.1.2 Install offline root and subordinate CAs 4.1.3 Install standalone CAs 4.1.4 Configure Certificate Revocation List (CRL) distribution points 4.1.5 Install and configure Online Responder 4.1.6 Implement administrative role separation 4.1.7 Configure CA backup and recovery Manage certificates 4.2.1 Manage certificate templates	6.1, 6.4, 6.5, 6.7	8
4.0	3.3.5 Import security templates 3.3.6 Import a custom administrative template file 3.3.7 Configure filtering for administrative template Configure Group Policy preferences 3.4.1 Configure printer preferences 3.4.2 Define network drive mappings 3.4.3 Configure power options 3.4.4 Configure custom registry settings 3.4.5 Configure Control Panel settings 3.4.6 Configure Internet Explorer settings 3.4.7 Configure file and folder deployment 3.4.8 Configure shortcut deployment 3.4.9 Configure item-level targeting Implement Active Directory Certificate Services (AD CS) Install and configure AD CS 4.1.1 Install Active Directory Integrated Enterprise Certificate Authority (CA) 4.1.2 Install offline root and subordinate CAs 4.1.3 Install standalone CAs 4.1.4 Configure Certificate Revocation List (CRL) distribution points 4.1.5 Install and configure Online Responder 4.1.6 Implement administrative role separation 4.1.7 Configure CA backup and recovery Manage certificates 4.2.1 Manage certificate templates 4.2.2 Implement and manage certificate deployment, validation, and revocation	6.1, 6.4, 6.5, 6.7	8
4.0	3.3.5 Import security templates 3.3.6 Import a custom administrative template file 3.3.7 Configure filtering for administrative template Configure Group Policy preferences 3.4.1 Configure printer preferences 3.4.2 Define network drive mappings 3.4.3 Configure power options 3.4.4 Configure custom registry settings 3.4.5 Configure Control Panel settings 3.4.6 Configure Internet Explorer settings 3.4.7 Configure file and folder deployment 3.4.8 Configure shortcut deployment 3.4.9 Configure tem-level targeting Implement Active Directory Certificate Services (AD CS) Install and configure AD CS 4.1.1 Install Active Directory Integrated Enterprise Certificate Authority (CA) 4.1.2 Install offline root and subordinate CAs 4.1.3 Install standalone CAs 4.1.4 Configure Certificate Revocation List (CRL) distribution points 4.1.5 Install and configure Online Responder 4.1.6 Implement administrative role separation 4.1.7 Configure CA backup and recovery Manage certificates 4.2.1 Manage certificate templates 4.2.2 Implement and manage certificate deployment, validation, and revocation 4.2.3 Manage certificate renewal	6.1, 6.4, 6.5, 6.7	8
4.0	3.3.5 Import security templates 3.3.6 Import a custom administrative template file 3.3.7 Configure filtering for administrative template Configure Group Policy preferences 3.4.1 Configure printer preferences 3.4.2 Define network drive mappings 3.4.3 Configure power options 3.4.4 Configure custom registry settings 3.4.5 Configure Control Panel settings 3.4.6 Configure file and folder deployment 3.4.8 Configure shortcut deployment 3.4.9 Configure item-level targeting Implement Active Directory Certificate Services (AD CS) Install and configure AD CS 4.1.1 Install Active Directory Integrated Enterprise Certificate Authority (CA) 4.1.2 Install offline root and subordinate CAs 4.1.3 Install standalone CAs 4.1.4 Configure Certificate Revocation List (CRL) distribution points 4.1.5 Install and configure Online Responder 4.1.6 Implement administrative role separation 4.1.7 Configure CA backup and recovery Manage certificates 4.2.1 Manage crificate templates 4.2.2 Implement and manage certificate deployment, validation, and revocation 4.2.3 Manage certificate enrolment and renewal for computers and users using Group Policies	6.1, 6.4, 6.5, 6.7	8
4.0	3.3.5 Import security templates 3.3.6 Import a custom administrative template file 3.3.7 Configure filtering for administrative template Configure Group Policy preferences 3.4.1 Configure printer preferences 3.4.2 Define network drive mappings 3.4.3 Configure power options 3.4.4 Configure custom registry settings 3.4.5 Configure Control Panel settings 3.4.6 Configure Internet Explorer settings 3.4.7 Configure file and folder deployment 3.4.8 Configure shortcut deployment 3.4.9 Configure tem-level targeting Implement Active Directory Certificate Services (AD CS) Install and configure AD CS 4.1.1 Install Active Directory Integrated Enterprise Certificate Authority (CA) 4.1.2 Install offline root and subordinate CAs 4.1.3 Install standalone CAs 4.1.4 Configure Certificate Revocation List (CRL) distribution points 4.1.5 Install and configure Online Responder 4.1.6 Implement administrative role separation 4.1.7 Configure CA backup and recovery Manage certificates 4.2.1 Manage certificate templates 4.2.2 Implement and manage certificate deployment, validation, and revocation 4.2.3 Manage certificate renewal	6.1, 6.4, 6.5, 6.7	8
4.0	3.3.5 Import security templates 3.3.6 Import a custom administrative template file 3.3.7 Configure filtering for administrative template Configure Group Policy preferences 3.4.1 Configure printer preferences 3.4.2 Define network drive mappings 3.4.3 Configure power options 3.4.4 Configure custom registry settings 3.4.5 Configure Control Panel settings 3.4.6 Configure Internet Explorer settings 3.4.7 Configure file and folder deployment 3.4.8 Configure shortcut deployment 3.4.9 Configure item-level targeting Implement Active Directory Certificate Services (AD CS) Install and configure AD CS 4.1.1 Install Active Directory Integrated Enterprise Certificate Authority (CA) 4.1.2 Install offline root and subordinate CAs 4.1.3 Install standalone CAs 4.1.4 Configure Certificate Revocation List (CRL) distribution points 4.1.5 Install and configure Online Responder 4.1.6 Implement administrative role separation 4.1.7 Configure CA backup and recovery Manage certificates 4.2.1 Manage certificate templates 4.2.2 Implement and manage certificate deployment, validation, and revocation 4.2.3 Manage certificate renewal 4.2.4 Manage certificate enrolment and renewal for computers and users using Group Policies 4.2.4 Configure and manage key archival and recovery	6.1, 6.4, 6.5, 6.7	8
4.0	3.3.5 Import security templates 3.3.6 Import a custom administrative template file 3.3.7 Configure filtering for administrative template Configure Group Policy preferences 3.4.1 Configure printer preferences 3.4.2 Define network drive mappings 3.4.3 Configure power options 3.4.4 Configure custom registry settings 3.4.5 Configure Control Panel settings 3.4.6 Configure file and folder deployment 3.4.8 Configure shortcut deployment 3.4.9 Configure item-level targeting Implement Active Directory Certificate Services (AD CS) Install and configure AD CS 4.1.1 Install Active Directory Integrated Enterprise Certificate Authority (CA) 4.1.2 Install offline root and subordinate CAs 4.1.3 Install standalone CAs 4.1.4 Configure Certificate Revocation List (CRL) distribution points 4.1.5 Install and configure Online Responder 4.1.6 Implement administrative role separation 4.1.7 Configure CA backup and recovery Manage certificates 4.2.1 Manage crificate templates 4.2.2 Implement and manage certificate deployment, validation, and revocation 4.2.3 Manage certificate enrolment and renewal for computers and users using Group Policies	6.1, 6.4, 6.5, 6.7	8
